

COMPANY PROFILE

An experienced supplier

In 20 years, have become one of the leading manufacturers in Europe. With over 95% of their output exported abroad, they aim to rank among the top 10 European players in the market.

A genuine garden buildings manufacturer

An experienced, clearly structured business with 3 manufacturing plants organised according to specialisation. The main plant manufactures standard buildings and cabins in large series. The second production unit supplies it with most of our joinery needs. Finally, the third plant is specialised in, and dedicated to, the manufacture of standard holiday cabins in 58 mm, 70 mm or 92 mm profiles. They make over 20,000 cabins a yr, by combining our total mastery of traditional manufacturing techniques with modern and efficient high-tech processes.

Unparalleled quality

To fully satisfy its customers, they have set up a quality management system that complies with ISO standard 9001. What's more, the cabins come with a 2- or 5-year warranty (subject to the terms of our general sales conditions).

FSC®-Certified, Scandinavian wood

Our cabins are manufactured using Nordic spruce wood. We have chosen this wood of Scandinavian origin for its natural hardness, long life span, structural resistance and aesthetic appearance, brought about by the very slow growth of the trees, due to the very long, harsh winters.

Respect for the environment is our priority, we have therefore made the responsible choice to use wood obtained from forests managed in accordance with FSC® rules (Forest Stewardship Council.).

Sophisticated product design

Inspired by the outdoor spirit, the range of cabins offers user-friendly, functional advantages, in either a classic or contemporary style. What's more, the expert skills of their designers & technical draughtsmen make an ideal partner for the development of your personalised projects.

Sustainable partnerships

The privileged partnerships with its customers are based on the search for joint commercial benefits in the long term. In order to meet the customers' needs and respond to the developments in its market, our company constantly strives to improve and perfect its work.

Flexibility of supply

Our sales team is renowned for its availability and responsiveness. It is willing and able to help you find solutions and adapt to last-minute changes and special requests.

Meeting our commitments

We make every endeavour to stick to our commitments to our customers and supply you with the required product on time. We can make speedy deliveries thanks to our coverage of the main European countries. Yet another reason why we should work together.

< All 70mm cabins come with improved window and door hardware for 2017
