

8.4m x 3m (28' x 10') Twyford Pent summerhouse with Contemporary glazing and optional fanlights

## Platinum Bespoke Multi Room Buildings

Why be forced into choosing between a workshop, storage shed, summerhouse or garden room when you can have any combination of these to suit your requirements? We understand that every family - and every garden - is totally unique so we are happy to offer a range of buildings which are made to measure without incurring any sort of financial premium. You won't want to be limited to three or four standard designs so we allow you to tailor any of our standard four-sided buildings to your requirements; you will be amazed at the number of different combinations that are possible. Simply choose any Platinum summerhouse, workshop or home office and, with the addition of one or more partitions and some extra doors (either externally or within the partition itself) you will soon design a striking building that is practical, long-lasting and unique to your specific taste and configuration.

To calculate the cost of your unique multi-room building; first determine the style of building that you wish to use as the base building (take the price of the building with the overall footprint that you wish to achieve) and then add the price of any internal partitions as well as any additional access doors or windows that are required. This information should all be available on the price guide associated with your specific base building, but we would always welcome you to one of our display sites where we will be delighted to calculate the costs and issue your own personalised quotation for the building of your dreams!

4.8m x 3m (16' x 10') Kingsclere Apex summerhouse with Contemporary glazing, optional fanlights and felt tiles
