

Platinum Potting Sheds/Greenhouses

Our Platinum Potting Sheds and Greenhouses are extremely popular with the gardener as they have been carefully designed with their needs in mind. We offer a choice of several distinct styles however, no matter which style suits your garden the best, you can be assured that we fit as much glass as possible to ensure that the maximum amount of light floods in to help your plants develop.

2.4m x 2.4m (8' x 8') Alresford Potting Shed (toughened glass/Onduline roof) stained in 'Misty Blue' with optional guttering

2.4m x 1.8m (8' x 6') Herriard Greenhouse stained in 'Ash Grey' with optional guttering

2.4m x 2.4m Alresford Potting Shed (PVC/Onduline roof) with optional guttering

3.6m x 1.8m (12' x 6') Medstead Potting Shed

2.4m x 1.8m (8' x 6') Alton Potting Shed

An example of our unique Bramdean bespoke build which is custom-built to your requirements

2.1m x 1.8m (7' x 6') Farringdon Potting Shed stained in 'Misty Blue'

Specifications

WALLS

Sturdy 47mm x 38mm (44mm x 34mm finished) pressure treated framing which is diagonally braced and screwed together before being clad with your choice of:

- 19mm (15mm finished) pressure treated T&G Shiplap
- 22mm (20mm finished) pressure treated T&G Loglap

FLOOR

All shed and potting shed sections come with a floor constructed from 19mm (15mm finished) pressure treated T&G on 47mm x 47mm pressure treated joists. Greenhouse sections are supplied without floor to aid drainage.

ROOF

- **Alton & Medstead** - heavy duty green mineral polyester-based rolled roofing felt atop 16mm (12mm finished) T&G matchboarding as standard with an option to upgrade the rolled roofing felt to Onduline.
- **Alresford** - configured to suit from a choice of Onduline roof covering on 16mm (12mm finished) T&G matchboarding, corrugated PVC panels or toughened glass panels
- **Farringdon** - glazed panel to the front of the building with 16mm (12mm finished) T&G matchboarding covered with Onduline roof sheets to the rear
- **Herriard** - toughened glass panes throughout
- **Bramdean** - toughened glass panes above greenhouse section with 16mm (12mm finished) T&G matchboarding covered with Onduline roof sheets above the shed section.

HEIGHTS

There is a minimum internal eaves height of 1.91m (6' 3") on all models with extra height being available if required. All standard external roof heights comply with the 2.5m maximum height restriction imposed when erecting a building under Permitted Development.

BUILDING STYLES

Alton - This is our traditional solar potting shed which benefits from a sloping glass front (incorporating an opening window) with a slatted bench beneath.

Medstead - A very popular pent roof building with a modern vertical front to maximise growing space. Again a slatted bench and stable door are standard and there will be an opening window to each end of the building

Farringdon - Similar to the Medstead but with an offset apex style roof allowing a corrugated PVC or toughened glass panel to be fitted to the front of the building; ideal for locations where the building might not otherwise receive the maximum amount of sunlight.

Alresford - Our best-selling potting shed and one which truly has it all: a traditional apex roof (either fully boarded or with half of the roof benefitting from a choice of either PVC or toughened glass glazing for maximum light) combined with an opening window in each gable end, a sturdy stable door and a strong slatted bench. A truly outstanding building.

Herriard - A charming greenhouse with fixed 1.2m (4') high glazing to all four sides, a part glass door and a single slatted bench to one side.

Bramdean - A unique combination of useful storage shed and a robust timber greenhouse, the Bramdean is based upon the Herriard Greenhouse style and configured to your size requirements. Please see our price sheet for details of the various size options. The greenhouse section will boast a sturdy glazed door and a slatted bench whilst the shed section will benefit from an integral floor, a standard boarded door and a fixed window.

DOORS

All external doors are 44mm thick and hung on black butt hinges and fitted with a 5-lever mortice lock and black ornate antique door handle. All doors are hung within a Traditional-style doorset with a proper frame and a timber threshold/cill for longevity.

Alton, Medstead, Farringdon & Alresford Potting Sheds

A single 0.76m (2' 6") wide x 1.78m (5' 10") high heavy duty Framed, Lugged and Braced stable door. If desired we can replace the stable door with a part glazed single door (as shown on the Bramdean photo overleaf) at no extra cost.

Herriard and Bramdean Greenhouses

A single 0.76m (2' 6") wide x 1.78m (5' 10") heavy duty part glazed single door is fitted as standard to allow even more light to flood in to the building. On 1.8m (6') wide greenhouses the width of the door is reduced to 0.6m (2') width.

WINDOWS

Given the nature of the building we purposely design it to feature as much glass as is possible for the given size however, as shown in the photos, the glass does not always extend 'wall to wall' for structural reasons.

- **Pressure treated Redwood floor, cladding and framing for long life**
- **Numerous designs and variations to complement every setting**
- **Huge amount of glass to maximise natural light**
- **Free on-site installation**
- **Option for exterior to be painted in a lacquer or coloured stain**
- **Choice of Apex or Pent roof styles**

All specifications are subject to change.
All sizes are nominal. E&OE.
