 Your building will be supplied with pressure treated cladding to guard against rot and to ensure a long life with minimal maintenance however we do recommend a suitable water repellent weather protector is applied externally as soon as possible after installation in order to prevent moisture ingress into the timber. As a service we are able to apply this protection before your building leaves the factory for an additional sum. You can choose from a selection of colours from the Valtti Color range (of which we show a selection on our display site) or the Valtti Kesto Plus translucent lacquer. When selecting this option we can apply Valtti Opaque paint to the door/window frames for an additional £12 per item.
